Features

Macspred Acidifier Surfactant is a multi-purpose adjuvant composed of natural surfactants and penetrants derived from soybeans oils. These are combined with propionic acid to produce a penetrant, surfactant, acidifier for use with herbicides, insecticides, fungicides, foliar fertilizers and plant growth regulators. The unique properties of **Macspred Acidifier** Surfactant enhance the uptake of many systemic herbicides, allowing them to effectively penetrate into leaves, without causing damage to non-target crop plants.

Macspred Acidifier will improve the performance of herbicides such as the Macspred Glymac range and Macspred Metmac.

Features	Benefits
Acidifying surfactant	Macspred Acidifier reduces alkaline hydrolysis. Ideal for use in highly alkaline water
Droplet Size Management to reduce spray drift	Macspred Acidifier Reduces drift by management of spray droplet size, reducing the number of droplets <150 microns
Increases penetration	Macspred Acidifier increases penetration in hard to control weeds
